accuchex.com

Streamline your workers' compensation coverage and payroll into one integrated system. With Accuchex, your payroll processing is closely coupled with your company's insurance needs.

Since workers' comp is mandated by law, coverage and benefits do not vary within a particular state. But rates and service may vary tremendously! And it's also important to choose a reputable, responsive insurance provider. Ask Accuchex for a quote to beat your current rates.

Premium billings can be computed and forwarded automatically to your agent at Accuchex Insurance Services LLC and your insurance carrier. There is nothing to research or recompile to satisfy your insurance reporting requirements. Quarterly and annual audits are a breeze with our detailed workers' compensation features and our integration to your payroll. Your accountant also gets a complete breakdown of workers' compensation costs for your organization structure (division, location, department, etc.), job code and position assignment.

When you are properly insured you are protected by statute against further liability for work injuries, except in cases of extreme negligence.

Let Accuchex Insurance Services LLC quote your workers' compensation coverage to reduce your costs and exposures. Workers' compensation earnings and premium reports flow directly from your payroll.

Accuchex Insurance Services

Accuchex Insurance Services, partnering with Accuchex payroll, provides an integrated solution delivered through sophisticated technology and superior service.

We understand that no matter what your business, employing people and the associated cost is one of your largest business expenses. We'll help to alleviate the headaches as well as the associated risks.

That's why Accuchex Insurance Services has teamed up with payroll to help eliminate those headaches by providing you an outsourced solution for payroll, integrated workers' comp administration, payroll tax filing, and HR data and benefit management. We provide all this while reducing the cost of these functions to you.

Give up the old "guess and confess" method of workers' compensation management. Talk to us direct about Accuchex Insurance Services integration. After a nominal down payment, your premium payment and information audits are just part of your payroll.

Workers' Compensation Administration & Payroll

Your Single Source for Payroll and Workers' Compensation Integration

Our insurance services enables us to provide personalized services for companies through an integrated single source system. Our management of your payroll and workers' compensation insurance information allows you to pass off time consuming administrative tasks, avoid large up-front ongoing deposits, as well limit those year-end surprises.

Using your current payroll information, Accuchex Insurance Services calculates, collects and distributes your workers' compensation premium information directly to your insurance company. Automating your coverage reduces your workers' comp liability exposure, slashes administrative costs, and will save you valuable time.

Components of Accuchex Insurance Services
